

Dust filter cartridge

120 NK

Ø 120 mm, Rd 72x5, conical

1. Features

Star-pleated Filtration Group dust filter cartridges are used to separate very fine particles from gases. The gas flows inward through the cartridge and is discharged via the open end cap on the top.

The conical shape is the outcome of the cartridge's superior flow behaviour and strength. Its performance has been significantly enhanced by the improved cleaning performance and the optimised flow conditions, especially in dust removal filters with jet pulse cleaning.

The conical elements of the 120 NK series are available in three different versions. The standard version has components made from galvanised steel. For higher requirements and food applications the FOOD version is available with stainless steel components and a polyester felt seal. The FOOD SF version is equipped with a cavity free silicone moulded seal which is more temperature resistant and prevents dust deposits on the element.

Regular, extensive material and performance tests are the key to the consistently high quality of Filtration Group dust cartridges. A team of dedicated engineers in our applications department and modern development laboratories constantly endeavour to mature and perfect our products. Applications tests both on the customer's side and in our own facilities form the backbone of affordable and reliable products.

Characteristics

- Very high loading capacity
- Improved cleaning properties
- Optimised flow conditions
- High stability
- Installation on the raw gas side (clean gas side installation with adapter)
- Compatible with Rd 60x4 threat (with adapter)
- Available in many lengths
- Universally suitable
- Food compliant elements (FOOD)
(EC 1935/2004 + EU 10/2011 and FDA) are available
- Simple, tool-free assembly
- Worldwide distribution

2. Technical Data

Materials

Inner core:	Galvanised steel (standard) or stainless steel V4A - AISI 316
End caps:	Galvanised steel (standard) or stainless steel V4A - AISI 316
Seal:	self-adhesive polyester felt seal (FOOD at V4A), cavity free silicone moulded seal (FOOD SF)
Filter material:	Ti 07/1 - Electrostatic conductive polyester fleece with PTFE membrane Ti 08 - Electrostatic conductive polyester fleece Ti 15 - Polyester fleece Ti 18/1 - PPS with PTFE membrane Ti 19/2 - Cellulose/polyester carrier with PP meltblown Ti 35 - Polypropylen Ti 56/2 - Polyester fleece with PTFE membrane Other filter materials on request

Cleaning

Nozzle:	Multi-jet nozzle G ³ / ₈ (MJD-12)
Cleaning pressure:	4 bar to 6 bar (max. 7 bar)
Differential pressure:	max. 18 mbar

For information on the compressed air tank and consumption, see data sheets for cleaning units.

Technical data is subject to change without notice!

* Based on a filter area load of 1.7 m³/m²min

These values may vary depending on the nature of the dust and the composition of the gas.

** Depending on media/materials, higher temperature ranges on request.

Other cartridges on request

4. Installation

The dust filter cartridge can be mounted on and dismantled from the filter plate using the Rd 72x5 thread adapter - no tools required.

A hole with a diameter of 80 mm must be drilled in the filter plate in order to mount the thread adapter. The stirrup and the thread adapter should be spot-welded to the filter plate as shown in the drawing.

Various adapters are available for installation on the cleaned side or for mating with Rd 60x4 or Rd 74x4 round threads.

Tightening torque min. 6 Nm/max. 12 Nm

5. Accessories

Order number	Designation	Description
Threaded adapter for fixing elements on the raw gas side		
77769201	Gewindestutzen Rd 72x5, evzk	Galvanised steel
79382318	Gewindestutzen Rd 72x5, 1.4571 3.1	Stainless steel
Adapter for mounting on the raw gas side on Rd 60x4 threaded connection piece		
78330508	Adapter Rd 60x4/Rd 72x5, evzk	Galvanised steel
76315329	Adapter Rd 60x4/Rd 72x5, 1.4571	Stainless steel
Adapter for mounting on the raw gas side on Rd 74x4 threaded connection piece		
76139950	Adapter Rd 74x4/Rd 72x5, 1.4571	Stainless steel
Adapter for clean gas side mounting		
78314445	Adapter Reingas Rd 72x5, evzk	Galvanised steel
78314528	Adapter Reingas Rd 72x5, 1.4301	Stainless steel
72338890	Adapter Reingas Rd 72x5, FDA	Stainless steel with food grade seal
Multijet nozzles for cleaning		
79741232	MJD-12 00 ROH A1	Aluminium nozzle (element assembly on raw gas side)
70375835	MJD-12 00 ROH V2	Nozzle stainless steel (element assembly on raw gas side)
76925655	MJD-12 00 REIN A1	Aluminium nozzle (clean gas side cartridge assembly)
72472172	MJD-12 00 REIN V2	Nozzle stainless steel (clean gas side cartridge assembly)
Replacement seals		
77727480	FLACHD 108,0X088,0X4,5 FILZ SK	Felt seal for galvanized cartridges
72421393	FLACHD 108,0X088,0X3,0 FILZ SK FDA HI131	Food grade felt seal for V4A cartridges (FOOD)
70375129	FORMD 124,0X089,0X13,0 30SH SI FDA	Cavity free, food-compatible silicone moulded seal (FOOD SF)

6. Cleaning

We recommend cleaning the dust filter cartridge with the Filtration Group multi-jet nozzle. The optimised geometry of the multi-jet nozzle guarantees excellent cleaning results with a significantly lower noise level.

The multi-jet nozzle is available from Filtration Group in aluminium or stainless steel. The Filtration Group MJD cleaning unit comprises the nozzle, a stirrup and various small assembly components. The stirrup maintains an optimum distance from the cartridge to ensure maximum cleaning efficiency.

7. Design

In addition to the cartridges of the 120 NK series, there are other cartridge versions with 120 mm diameter and Rd 72 thread:

120 NZ - short cylindrical cartridges

120 XK - reinforced conical cartridges for higher temperatures

120 OZ - cartridges with open bottom pleat and cavity free moulded seal

Please contact us for detailed technical information, any open questions and for general expert advice. Completion of the relevant questionnaire would facilitate in the coordination of all important parameters.

Comprehensive documentation on our product range, cleaning units and cartridges can be provided.
